

TrueVIS VG2 and SG2 Printer/Cutters

OUTSTANDING COLOUR

New TrueVIS TR2 ink for Vibrant Colour

In addition to seven colours and White, new award-winning TR2 ink supports Orange ink to further increase the breadth of colour gamut and add real impact and high visibility to graphics. For even richer prints, a new Multi Process Color Function enables Orange ink to be used in all file types as a process colour, or as a spot colour for accurate colour matching.

Enhance your Business with 'True Rich Color'

The True Rich Color colour management preset takes full advantage of the VG2/SG2's superior colour reproduction capability and the wider colour gamut provided by new TR2 ink. Now vibrant colour can be combined with neutral greys, smooth gradations and natural skin tones to create stunning graphics. This pioneering print quality is unequalled for durable prints.

RELIABILITY, DURABILITY AND SAFETY

The VG2/SG2 with TR2 ink is certified for long lasting results by 3M™ MCS™ Warranty, providing your customers with the assurance of the quality and reliability of their graphics. It is also certified by the Avery Dennison™ ICS™ Performance Guarantee which provides protection for up to 4 years outdoors and up to 7 years indoors³. Graphics produced with TR2 inks are GREENGUARD Gold certified to be safe when used, even in sensitive locations such as schools and hospitals.

EXCEPTIONAL PERFORMANCE FOR SAME DAY TURNAROUND

Get ahead of the competition - fast drying speeds allow you to print, then laminate in as little as 6 hours² for true same day installation, with the reassurance of quality output and reliable installation.

6

FlexFire Printhead

Roland DG FlexFire printheads maximise printing performance so that even the highest speed setting delivers neutral greys, vivid colours and smooth skin tones.

VG2 series (4 heads)

SG2 series (2 heads)

HIGHLY RELIABLE PRINT & CUT PRODUCTION

Automated Long-run Decal/Label Production

With some other print solutions, when producing stickers, decals and labels, due to media tolerance and the length of the print job, print and cut accuracy can decrease. With the advanced cutting functionality of the VG2/SG2 you are assured consistent, high-precision accuracy, however long the print job.

Lengthy Print & Cut Jobs with Crop Marks

The new multiple cropmark function, with variable options for cropmark registration, means you can choose cropmark frequency based on the length of your print job.

Continuous Print & Cut per Shorter Distances.

The Custom Page function allows you to separate long production runs into manageable sections and use a Print & Cut automated workflow, even in conjunction with the supported TUC-4 take-up system, for maximum accuracy, minimum waste and faster overall turnaround.

Eliminate Trimming with Perforated Cut

Speeding up turnaround time, the improved cutting control technology of the VG2/SG2 introduces a precision perforated cut function for producing die-cut, ready-made decals and even custom-shaped labels – without the need to trim.

Two Take-Up Modes

A new take-up unit supports two modes according to the type of media chosen, securing take-up for smooth post-processing.

Nozzle Mask Function

A nozzle masking function allows you to continue printing in the unlikely event of a nozzle being blocked.

New Media Clamp

A new media clamp allows sheet cutting without removal.

VersaWorks 6 TO POWER YOUR BUSINESS

The new VersaWorks 6 RIP software is designed to simplify operation while maximising the power of your VG2/SG2 and other Roland DG devices. A Harlequin RIP dual-core engine with support for PDF 2.0 and native 64-bit processing provides accurate rendering of PDFs with shadows and transparencies.

- An icon-based interface with drag-and-drop functionality facilitates ease of use
- Five print queues and the ability to save and store unlimited queue settings
- Special Color Plate Generation lets you auto-generate White ink layers from within the RIP
- Built-in Pantone® and Roland Color spot colour libraries
- Easy printer colour matching for consistent colours.
