

The “Print and Cut” function immediately turns an idea into a real product

The multiple functions of the CJV300 models enable high-quality printing and high-accuracy cutting. The CJV300 alone completes the production of labels, stickers, and vehicle wrapping films.

The continuous-register mark-detection function enables continuous media cutting.

The CJV300 automatically detects all register marks set by the RasterLink6 on the media, and cuts contour lines precisely by utilizing simultaneous automatic calibration.

Print and cut on no-register mark media / Cut and print function

Media up to 1m in length do not require register marks. This function reduces the medium requirements.

Outstanding speed

The CJV300 models provide high productivity and high image quality.

RASTER LINK 6

The newly developed software RIP with user-friendly operation and high functionality

It would mean nothing to provide high-performance software with a variety of useful functions if the software itself is too difficult and complicated to use... The newly developed RasterLink software was designed to be extremely user-friendly with this idea in mind. With a wide variety of newly added features, RIP software, software for people of all ages and backgrounds, now encompasses a perfect package with all of the features needed to reproduce beautiful full-color finishes in high definition with the easiest set of controls to use to navigate with!!

Specifications

Item	CJV300-130	CJV300-160
Printhead	On-demand piezo head (2 staggered printheads)	
Print resolution	360 dpi, 540 dpi, 720 dpi, 1440 dpi	
Maximum print width	1,361 mm (53.5 in)	1,610 mm (63.3 in)
Maximum media width	1,371 mm (53.9 in)	1,620 mm (63.7 in)
Ink	Type/Color	Eco-solvent ink SS21 (C, M, Y, K, Lc, Lm, Lk, Or, W, Si) BS3 (C, M, Y, K) only available in emerging countries Water-based sublimation ink Sb53 (Bl, M, Y, K, DK, Lb, Lm)
	Package size	SS21: 440 ml Ink cartridge/2 L Ink pack (White and silver are provided in 220 ml Ink cartridge only.) BS3: 600 ml Ink pack/2 L Ink pack Sb53: 440 ml Ink cartridge/2 L Ink pack * Optional MBIS3 (Mimaki Bulk Ink System3) is required for using 2 L Ink pack.
Media thickness	MCT (Mimaki Circulation Technology) (Only applies to white and silver inks)	
	1.0 mm or less	
Certifications	VCCI class A / FCC class A / ETL (UL 60950-1)	
	CE Marking (EMC, Low voltage, and Machinery directive) / CB RoHS / REACH and Energy Star / RCM	
Interface	USB 2.0, LAN for E-mail notification function	
	Single-phase (AC100-120V / AC200-240V) × 2	
Power supply	100V: 2.88kW (1.44kW × 2), 200V: 3.84kW (1.92kW × 2)	
	Temperature: 20-30°C (68-86°F), Humidity: 35-65% Rh (Non condensing)	
Operational environment	2,525 mm × 700 mm × 1,392 mm (99 in × 28 in × 55 in)	
	2,775 mm × 700 mm × 1,392 mm (109 in × 28 in × 55 in)	
Dimensions (W × D × H)	167 kg	
	178 kg	
Weight

Print 'n' cut

IMAGINATION TO CREATION

Silver ink inspires imagination

Newly developed SS21 silver ink is available. Being 1.67* times brighter than conventional silver inks, SS21 ink adds brilliant and beautiful mirror effects to print results.

* Obtained from comparison measurements of SS21 and ES3 silver inks conducted at the Mimaki HQ.

Silver color added to catch copies and logos strikes a profound impression on the viewers, which makes silver printing very appealing.

The intensity of brightness in the silver ink varies as per the viewing angle. Such a high level of brightness attracts the viewer.

Diverse print expressions stimulate your creativity

Achieves a higher level of expression by using orange ink

By using the orange ink as a process color, 94.8% of the PANTONE color chart is covered with approximate colors. Thanks to a wider gamut with the orange ink, food freshness can be simulated, and corporate colors can be faithfully represented.

Conventional ink-set

Ink-set including the orange ink

Accurate expression with light black ink

The light black ink improves the printed grayscale gradation. It also faithfully represents monochrome data without introducing unexpected color shifts. Light black ink ensures a more accurate color representation.

Conventional ink-set

Ink-set including the light black ink

Alluring print quality that invigorates your creative abilities

Banding reduction

The reputable anti-banding function MAPS2 has been improved to MAPS3*. Advanced MAPS3 scatters ink droplets and overlaps prints on areas of frequent banding.

* MAPS3: Mimaki Advanced Pass System 3

Advanced ink jet technology ensures high-quality printing at all times

Mimaki's unique advanced ink jet technology allows the print head to jet each ink droplet at the appropriate jetting angle while retaining excellent ink droplet circularity. This advanced technology ensures that texts, lines, and edges are clearly printed.

Printing without waveform management

Printing with optimized waveform

3-Way intelligent heater

A 3-way intelligent heater fixes droplets placed on media. By using Mimaki's original technology in heating the media at a controlled temperature, ink can be fixed while maintaining high color development and high image quality. Thus the CJV300 provides both steady color development and easy handling after printing.

- Pre-heater: Heats media to the optimum temperature before printing.
- Print heater: Dries ink after it lands on media before it bleeds, improving color development.
- Post-heater: Enhances ink drying and achieves stable take-up.
- Top blower: Air blower supports drying of ink.

3-way Intelligent Heater patent No.
Japan: 4889059 USA: 8.444.262 China: ZL 200910222559.8

Smooth gradation printing

By ejecting 3 different dot sizes (Large/Medium/Small), images are expressed smoothly without graininess, even in large-format printing. Furthermore, the Large dot size is 35pl and by using this size effectively, light and shade can be expressed firmly while using higher printing speed settings.

Simple and practical for everyday use

Continuous operation support pack to minimize downtime

The CJV300 is prepared with the following continuous operation support pack to minimize downtime in case of emergency such as machine failure.

Productivity maintenance - NRS*1

The NRS substitutes defective nozzles with non-defective nozzles until the technician arrives. This feature enables uninterrupted print operations and continuous productivity.

*1 NRS: Nozzle Recovery System

*2 10 nozzles per nozzle row can be registered.

Prevention of print quality problems - NCU*

The CJV300 is equipped with Mimaki's original automatic NCU. Clogged nozzles are automatically detected and cleaned by the NCU. If the clogging is not resolved by cleaning, the CJV300 automatically sets the nozzle recovery function NRS and resumes printing. These functions significantly reduce the waste printing caused by clogged nozzles during a continuous printing run.

* NCU: Nozzle Check Unit

Stable printing using the ink circulation system - MCT*

MCT is a standard feature included to effectively avoid the settling of white and silver pigments in the ink lines by regularly circulating the ink. It prevents print troubles and enables stable output from the start of operation. In addition, MCT contributes to reduction of ink waste, thereby supporting environmentally and economically friendly applications.

* MCT is only available for white and silver inks.
(MCT = Mimaki Circulation Technology)

Reliable ink supply system

UISS*

The CJV300 is equipped with a 2-ink cartridge per color. Even if one cartridge becomes empty, ink supply continues from the other cartridge, preventing print suspension from ink end.

Non-stop ink replacement

Cartridges that are out of ink can be replaced while printing. This prevents print suspension from ink end.

MBIS III (Option)

Optional MBIS III with its large 2L ink pack enables continuous printing at a reduced operational cost.

* UISS is compatible only with the CMYK ink set.
